This book presents XML programming from a conceptual perspective, teaching not just the technology, but the background and thinking behind it. Developers learn to do it right, gaining a thorough understanding of the hows and the whys from the ground up. Rather than teaching programmers to memorize specific APIs, this book teaches programmers how to think about XML programming in a language-neutral way, with examples in various languages (such as Java, C++, Perl, and VB) and provides guidance on how and when XML can be used in real-world situations.
XML Primer Plus
By Nicholas Chase

Publisher : Sams Publishing

We Want to Hear from You!
Introduction
  The Historical Perspective
  The Basic Nature of XML
  Some Sample Applications of XML
  How Does It All Fit Together?
  What You Do and Don't Need to Know
Conventions

Part I: XML Fundamentals
  Chapter 1. Basic XML Document Structure
    The Structure of an XML File
    Elements
    Attributes
    Beyond Elements and Attributes
    Well-Formed Versus Valid Documents
    Namespaces
    Summary
    Review Questions
Chapter 2. Designing XML Documents and Applications

The Planning Process
Defining the Goals and Objectives
Gathering the Team
Gathering Information
Function/Process Modeling
Data Modeling
Checking the Model
Creating the Structure
The Final Structure
Summary
Review Questions
Programming Exercises

Chapter 3. Manipulating Documents: The Document Object Model (DOM)

What Is the Document Object Model?
The DOM Structure
Navigating a DOM Document
Changing Content
Creating New Content
Summary
Review Questions
Programming Exercises

Chapter 4. Advanced DOM Techniques

Additional Features of the DOM Level 2.0 Core
DOM Level 2.0 Traversal
DOM Level 3.0 Load and Save
Summary
Review Questions
Programming Exercises

Chapter 5. XML Streams: The Simple API for XML (SAX)

What Is SAX?
Creating the Parser
Handling Events
Creating the Application
Filters and Chains
Summary
Review Questions
Programming Exercises

Chapter 6. Validation

What Is Validation?
Validating Documents
Chapter 7. Document Type Definitions (DTDS)
  Types of DTDs
  Creating Elements and Content Models
  Creating Attributes
  General Entities
  Parameter Entities
  Summary
  Review Questions
  Programming Exercises

Chapter 8. XML Schemas
  Schema Structure
  Simple Elements
  Complex Elements
  Referencing Predefined Elements
  Adding Attributes
  Creating New Types
  Deriving Custom Types
  Data Integrity
  Namespaces
  Other Schema Proposals
  Summary
  Review Questions
  Programming Exercises

Chapter 9. Extensible Stylesheet Language Transformations (XSLT)
  XSL, XSLT, and XSL-FO
  Basic Style Sheet Transformations
  An Overview of XPath
  Templates
  Creating Content
  Variables and Parameters
  Flow Control
  Modes
  Summary
  Review Questions
  Programming Exercises

Chapter 10. Transformation and Applications
  Transformation Methodologies
  Transforming Data
Chapter 11. Selecting Data: XML Path Language (XPATH)

What Is XPath?

How XPath Works

Axes

Node Tests

Location Paths

Predicates

Functions

Summary

Review Questions

Programming Exercises

Part II: Using XML

Chapter 12. Browser-Based XML: Cascading Style Sheets (CSS)

Gathering the Pieces

Selectors

Properties

Controlling Appearance

Layout and Flow

Other Media

Summary

Review Questions

Programming Exercises

Chapter 13. Browser-Based XML: XHTML

XHTML Overview

Basic XHTML

XHTML Forms

Converting XML to XHTML with XSLT

HTML DOM in the Browser

Summary

Review Questions

Programming Exercises

Chapter 14. XML Linking Language (XLink)

XLink Overview

Link-Building Basics

Extended Links

Linkbases
Review Questions
Programming Exercises

Chapter 19. XML and Databases: Relational Databases
Types of Systems
Types of Data
XML Relational Mapping Models
XML-Enabled Databases
Summary
Review Questions
Programming Exercises

Chapter 20. XML and Databases: Native XML Databases
Overview of Native XML Databases
NXD Basics
Using the XML:DB API
XQuery 1.0 and XPath 2.0
XUpdate
Summary
Review Questions

Chapter 21. Where We Go From Here
The 10,000-Foot View
Existing Vocabularies
Where We're Going
Last Words

Part III: Appendixes
Appendix A. Resources
Introduction
Chapter 1
Chapter 2
Chapter 3
Chapter 4
Chapter 5
Chapter 7
Chapter 8
Chapters 9–10
Chapter 11
Chapter 12
Chapter 13
Chapter 14
Chapter 15
Chapter 16
Chapter 17
Chapter 18
